Chapter 1

Purpose/Aims of the Product

The goal of the project is to create a software that will drastically reduce the amount of work the employees of "BookExpress" spend on logistics and administration, thus speeding up the processes and making sure that every customer gets his or her orders as soon as possible, within the specified timeframe (24 hours). The current IT system is not as flexible or comfortable as it should be - as a result, the business processes, such as maintaining a stock database that is consistent as well as up-to-date. The user interface has to be intuitive and performant, relieving the employees of a lot of administrative work. By establishing a direct connection to the

Chapter 2

Usage of the Product

This is the usage, test.
